Name: _____ Date: _____

NEW BLUE CAREERS IN ADVANCED MANUFACTURING

EXPLORING A MANUFACTURER CLOSE TO HOME

Choose a manufacturing company NEAREST to your home and use the internet to try to find answers to the following questions:

1. What is the name of the company and where is it located?

2. How far is this company from where you live (if you can, use the internet to find a distance, if not, estimate the best that you can)?

3. What types of product(s) does the company produce and where/how are they used? (Some of the products may be used as parts in larger products. If this is the case, write the product that they are used in and why these pieces are important. Research the products if you're not sure).

4. What types of technology does the company use to produce their trademark products?

5. Who are their customers?
